

Sysmex Korea Co., Ltd.

Sysmex Corporation is an integrated company, developing and manufacturing the instruments, reagents and software that are needed for in vitro diagnostics, along with the necessary sales and support networks. Serving customers for more than 50 years, Sysmex focuses on technological leadership in in vitro diagnostics (IVD) and information that make a difference in the health of people worldwide. The company is also exploring emerging opportunities in the life science field. Its R&D efforts focus on the development of high-value-added testing and diagnostic technologies that are innovative, original and optimize individual health and personalized healthcare. Sysmex also seeks to leverage its state-of-the-art technologies for cell, gene and protein analysis.
